Vancouver, B.C. | Authorized to work in Canada

PROFESSIONAL OVERVIEW

Product Designer with experience designing digital banking products, translating complex workflows into intuitive user experiences. Skilled in user research, interaction design, and cross-functional collaboration, with hands-on experience exploring AI-assisted experiences and designing error recovery flows.

WORK EXPERIENCE

UX RESEARCHER / PRODUCT DESIGNER | Nityo Infotech — Cathay United Bank, Taipei, Taiwan APR 2024 – NOV 2025

- Led the design of a conversational AI feature for mobile banking, from concept to launch. In usability testing with 20 participants, users took 62% less time to find specific transactions than with traditional filter-based search.
- Designed mobile banking features that help customers understand spending through breakdowns and visual summaries. The redesigned entry point accounted for 21% of entries to Spending Insights after launch.
- Analyzed 12 user interviews and usability-test findings to identify barriers to understanding financial data. Turned the findings into five design recommendations for the conversational banking experience.

INTERACTION DESIGNER | TECHARTGROUP, Taipei, Taiwan OCT 2020 – NOV 2023

- Led end-to-end design of multi-device interactive experiences for banking and financial exhibitions, from user research and concept development through prototyping, testing, and developer handoff.
- Created storyboards, user flows, interaction logic, and prototypes to define multimedia experiences and support validation, testing, and development.

PRODUCT DESIGNER | BRIDGETOP, New Taipei, Taiwan DEC 2019 – JUN 2020

- Redesigned website information architecture, visual interfaces, and product pages while managing product content and listings.
- Collaborated with a 5-person team to develop concepts aimed at increasing website engagement among potential customers.
